SUMMARY

AI & Data Science undergraduate and full-stack developer building web applications with React, TypeScript, Node.js, and cloud services. Developed productivity, image-processing, and routing tools. Competitive programmer with Codeforces Pupil and CodeChef 3-star peak ratings; seeking software development internships.

EDUCATION

JECRC Foundation, Jaipur | B.Tech, Artificial Intelligence & Data Science | Pursuing
CGPA: 8.71/10. Class XII: 85%, Mahaveer Public School (2023); Class X: 90%, Jaipur International Public School (2021).

TECHNICAL SKILLS

Languages: C++, JavaScript, TypeScript | **Frontend:** React, Next.js, TanStack, Tailwind CSS
Backend & Data: Node.js, Express.js, Supabase, Firebase Authentication, Firestore, REST APIs
Cloud & Tools: Google Cloud Run, Gemini API, Cloudinary, Razorpay, n8n, Git, GitHub
Foundations: Data structures and algorithms, optimization, debugging, responsive web development

SELECTED PROJECTS

SmartFlow AI | React, TypeScript, Firebase, Gemini, Cloud Run | Live app

- Built a productivity workspace combining an urgent/important task matrix, daily planning, Pomodoro focus sessions, and habit tracking.
- Integrated a Gemini assistant with voice and attachments, Google Calendar and Gmail workflows, and Firebase-backed authentication and data storage.

Pixora AI | React, Supabase, ClipDrop API, Cloudinary, Razorpay, n8n | Live app

- Developed an image background-removal workflow with responsive upload, before/after preview, and download interfaces.
- Connected authentication, image storage, user credits, and payment processing; coordinated processing and account updates through n8n workflows.

Fair Relief Routing | C++17, CVRP, Local Search, 2-opt | GitHub

- Built a relief-allocation and vehicle-routing optimizer under a 70% stock constraint, prioritizing minimum regional service before balance and travel distance.
- Implemented capacity-constrained route construction, 2-opt improvement, validation, and an interactive SVG dashboard for three CVRPLIB instances.

Honey Comb | Node.js, Express, Groq, Llama | GitHub

- Built a scam-intelligence API combining pattern detection, structured identifier extraction, and context-aware multi-turn responses. Selected among the Top 2% of teams at the AI India Impact Summit hackathon.

COMPETITIVE PROGRAMMING & ACHIEVEMENTS

- **Codeforces:** Pupil; peak rating 1375; 365 problems solved; best Division 3 global rank 792.
- **CodeChef:** 3-star peak; maximum rating 1613; global rank 219 in Starters 238 Division 3.
- **LeetCode:** Contest rating 1754; 368 problems solved, including 197 medium and 45 hard; 22 rated contests.
- **GeeksforGeeks:** Completed the 160-day DSA challenge; 206 problems solved.
- First runner-up, JECRC web development competition (July 2026).

CERTIFICATIONS & WRITING

Google Cloud skill badges: Prompt Design in Vertex AI; Develop GenAI Apps with Gemini and Streamlit; Gemini and Multimodal RAG. Published five learning articles on medium.com/@puneetsaxena168.
